

## New AFS Logicwall Corner Caps and Nibs

Where the return leg from a corner junction meets a window or door opening, the following rules apply.

**1.** Where the return nib is 280mm or greater, a panel can be inserted with a minimum of 2 stud.

**2.** Where the return nib is less than 280mm, the corner junction will be a butt joint consisting of an endcapped nib panel and a 'T' joint for the adjacent wall.
